FLEABAN® DUAL ACTION 5MONTH
FLEA & TICK BAND FOR DOGS

For the treatment and control of fleas (*Ctenocephalides felis*) for 5 months and an aid in the control of ticks (*Rhipicephalus sanguineus*) (not paralysis tick – *Ixodes holocyclus*) on dogs for up to 5 months and the prevention of development of flea eggs and larvae for 5 months.

DIRECTIONS FOR USE:

This product should not be used on puppies under 3 months of age, or on sick or convalescing animals.
Animals should not be allowed to chew the collar.
This product should not be used in conjunction with other anticholinesterase insecticidal animal treatments.

Instructions

Remove collar from inner envelope and dispose of the pack immediately. Fix collar around the dog's neck allowing two fingers to fit between the collar and the animal. Cut off and dispose of any excess length. Remove collar immediately should any skin irritation occur. Replace collar every 5 months for continued flea control.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

FIRST AID: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

Flea Control Programme

Effective long-term control of fleas requires an integrated flea control programme to break the flea breeding cycle. An effective flea control programme includes all the following steps:

1. Treat all pets at the same time: Fleas can readily spread from one pet to another, so it is important to treat all cats and dogs in your household at the same time.
2. Treat your pet's environment: Treat your pet's bedding and where your pet frequents.
3. Maintain this flea control programme all year round, particularly throughout the warmer, humid months when fleas are most active.

Should your dog continue to scratch during treatment, seek veterinary advice.
