Product Guide ⤴

INSTRUCTIONS:
Dosage and Administration: Administer one tablet on any day when fleas are evident on your pet. Repeat on any subsequent day when fleas are again evident on your pet. Exelpet Capstar Tablets can be administered to puppies from four weeks of age if over 11kg. Exelpet Capstar tablets can be dosed directly into the mouth, or can be given mixed in a small portion of your pet's favourite food.

<p>FIRST AID: If poisoning occurs, contact a doctor or the Poisons Information Centre. Phone Australia 131126.</p> <p>PACK TYPE: Carton</p> <p>PRODUCT RECOMMENDATION: Flea Control Programme: Effective long-term control of fleas requires an integrated flea control programme to break the flea breeding cycle. An effective flea control programme includes all the following steps: 1. Treat all pets at the same time: Fleas can readily spread from one pet to another, so it is important to treat all cats and dogs in your household at the same time. 2. Treat your pet's environment: Treat your pet's bedding and where your pet frequents. 3. Maintain this flea control programme all year round, particularly throughout the warmer, humid months when fleas are most active. This product can be used in conjunction with other flea and worm control products.</p> <p>PRODUCT WARNING: For animal treatment only.</p>	<p>FEEDING INSTRUCTIONS: N/A</p> <p>FEEDING GUIDE BASED ON: N/A</p> <p>INDIVIDUAL PRODUCT SIZE: N/A</p>
